The Best Bulk Container for SAFE Seed Handling & Distribution

SeedBox™ Container

The reusable SeedBox™ from Buckhorn is the best, most efficient container available to transport and dispense seeds.

The SeedBox's unique design provides a safer work environment, saves labor by eliminating the need for flexible bulk bags and reduces expendable packaging and disposal costs. The smooth, sloped interior and a generous, center discharge port empty contents safely, completely and quickly – as fast as 30 seconds. The container's high-strength, plastic construction easily handles loads up to 2,500 lbs. (1,134 kg), and multiple containers interlock when stacked or nested for safe, stable storage. Nested containers take up 40% less space, maximizing warehouse storage.

SeedBox Containers are available exclusively from Buckhorn, your one source for reusable packaging opportunities that drive efficiency and costs savings in your supply chain.

Content Security

Lids and discharge door can be sealed with security ties to prevent content contamination.

“Crown” Channels

Lid designed for runoff prevents accumulation of water and ice.

Tight Fitting Lid

Extra product protection against rain, rodents, dust, dirt and other contaminants. Lids feature reinforced ribbing, corner stacking supports and water runoff channels.

Rugged Construction

Molded of high-density polyethylene (HDPE) structural foam. Will not rust, peel or splinter. Resistant to water, mild acids and withstands temperatures of -20° F to 120° F (-28.8° C to 48.8° C).

Cross-Member Reinforcement

Molded-in cross members for additional lateral strength and reinforcement.

Interior Funnel Design

Smooth sides and funnel shape for complete emptying without tipping.

Inspiring Innovation

Buckhorn's SeedBox inspired equipment manufacturers to develop better handling methods to help nest and stack the container (left), as well as transport vehicles (right) that efficiently deliver seed to planters in the field.

Four-Way Entry Pallet Base

Compatible with forklifts and pallet jacks. Solid oak base rails eliminate slippage on forklift tines.

Side Access Sliding Door

Allows one person to control the flow and safely remove all or part of the container's contents.

Sliding Door Latch

Easy-to-operate latch handle secures and releases the sliding door. Molded-in slots allow installation of security ties.

Easy Operation Locks

Latches securely lock top ring to base.

Center Flow Discharge

Safe, quick emptying of part or all of the container's contents.

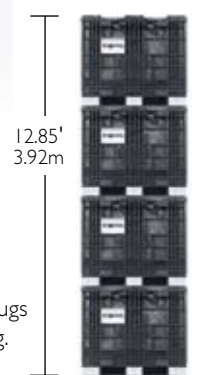

SeedBox™ Benefits:

- Designed for safe, one person operation
- Smooth interior for quick, complete content discharge
- Stack and nest for efficient shipping and safe storage
- Excellent protection against rodents and contaminants
- Eliminates waste and costs from bag purchasing and disposal
- Durable construction for long service life
- Reusable and completely recyclable

Secure Stacking

Container features guide lugs on the lid for easy stacking. Maximum stack filled: four containers.

Nested

Recommended maximum stack when filled: 4 containers

Stacked

Efficient Nesting Storage

Removable ring inverts and nests over base for compact storage. When nested, the SeedBox takes up 40% less space.

Detach ring

Invert

Nest

Clear Plastic Document Holders

Hold identification tags and forms. Two zipper pouches are standard, one each on the 45" ends. Other options available, see back page for details.

HDPE Signs

For visual identification of the owner.

Reinforced Feet with Steel Hit Plates

Steel plates deflect forklift tines and prevent spearing for extended utility. Reinforced feet allow secure stacking, up to four high.

Four-Way Entry Pallet Base

Easy handling by forklift or pallet jack.

Wide Range of Seed Applications...

Soybeans

Wheat

Cotton

Corn
